EDUCATION

University of Houston Bachelor of Science in Computer Science, Mathematics Minor - Coursework: Software Design, Database Systems - NSM Dean's List: Spring 2025	Expected Spring 2026 Houston, TX
--	---

EXPERIENCE

Information Technology Intern <i>Harris County Precinct 2</i> - Developed and implemented a real-time network monitoring tracker, resulting in a 30% reduction in network downtime. - Deployed a real time vehicle tracking system, enabling location and usage analytics for resource allocation. - Resolved 50+ hardware issues and trained over 30 staff across 13 sites, improving overall operational efficiency.	June 2024 – August 2024 <i>Houston, TX</i>
Coding Instructor <i>Coder Kids</i> - Managed 34 K-5 students, developing an engaging and structured learning environment to grow confidence. - Utilized Scratch and Code.org to teach programming fundamentals through interactive, project-based learning. - Fostered student development and parent engagement through consistent weekly progress reporting.	January 2025 – May 2025 <i>Houston, TX</i>

PROJECTS

DevDoc AI <i>Python, GPT4.1 nano, Git</i> - Built an AI-powered assistant that answers programming questions using Retrieval-Augmented Generation. - Reduced hallucinated responses by grounding outputs in official technical documentation for Python. - Engineered a prompt injection pipeline with LangChain to retrieve the top-k contextually relevant documentation. - Scraped and parsed documentation using requests and BeautifulSoup enabling vector indexing.	August 2025 – Present
Master Mind <i>C#, ASP.NET, NUnit, Next.js, Git</i> - Implemented 25 unit tests using test-driven development with NUnit, reducing overall bug detection time. - Created a RESTful API for game logic, enabling seamless integration of the game into diverse front-end apps. - Designed an interface using Next.js, enhancing user experience through intuitive controls.	August 2024 – December 2024
Ship-It <i>React.js, Express.js, MySQL, AWS, Git, Postman</i> - Led a team of 5, organized weekly check-ins, achieved 100% milestone delivery, while utilizing Git for source control. - Built a dynamic full-stack shipping platform for managing orders, deliveries, and logistics. - Contributed to RESTful API creation, facilitating user authentication with Express.js, TypeScript, and Postman.	August 2024 – December 2024

LEADERSHIP

Corporate Relations Officer <i>CougarCS</i> - Cultivated partnerships with over 5 major companies, hosting events that connect our members with recruiters. - Facilitated event logistics through weekly meetings with executives, streamlining the planning process. - Honed professional communication skills by successfully securing partnerships and sponsorships with corporations.	May 2025 – Present <i>University of Houston</i>
Algorithms Workshop Director <i>CougarCS</i> - Directed and delivered tailored workshops for COSC 3320, providing 150+ students with critical study resources. - Empowered a team of 3+ tutors, overseeing content creation and workshop facilitation, ensuring high-quality support. - Developed confidence in public and technical communication by articulating complex Computer Science topics.	January 2025 – May 2025 <i>University of Houston</i>

TECHNICAL SKILLS

Languages: Python, C#, C/C++, SQL, JavaScript, TypeScript, HTML, CSS
Frameworks: React.js, Next.js, Node.js, Flask, ASP.NET, NUnit, Express.js, Tailwind CSS
Developer Tools: VS Code, Git/GitHub, MySQL, Docker, Postman, WSL, AWS, Azure
